

# U.S. PHYSICIANS GROWTH RATE SUMMARY

## Introduction

The United States continue to discuss the current and future growth of physicians. Accessing the potential of nations' future physician workforce is most important to give the public and private sectors the information that they need. This allows making investments in optimizing the growth of physicians to deliver high quality healthcare to the U.S healthcare business and public. Also, the change in the healthcare industry is necessary to update and improve physicians' workforce projection.

## New Research Shows Increasing Physician Shortage by 2030

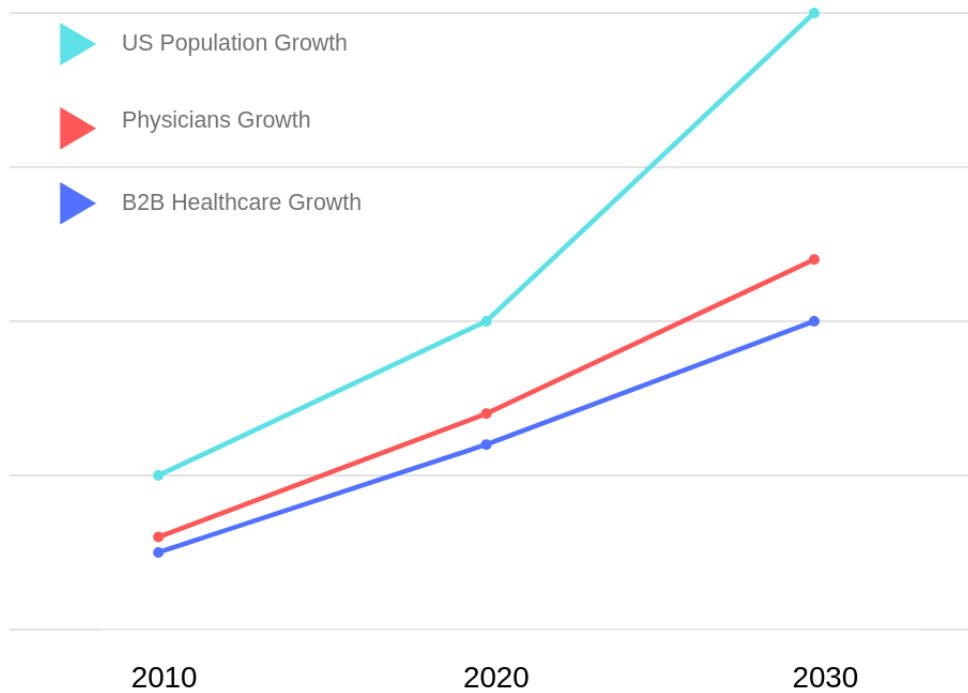

A recent study from AAMC (Association of American Medical colleges) shows the United States could see a shortage of up to 120,000 physicians by 2030 across the nation.

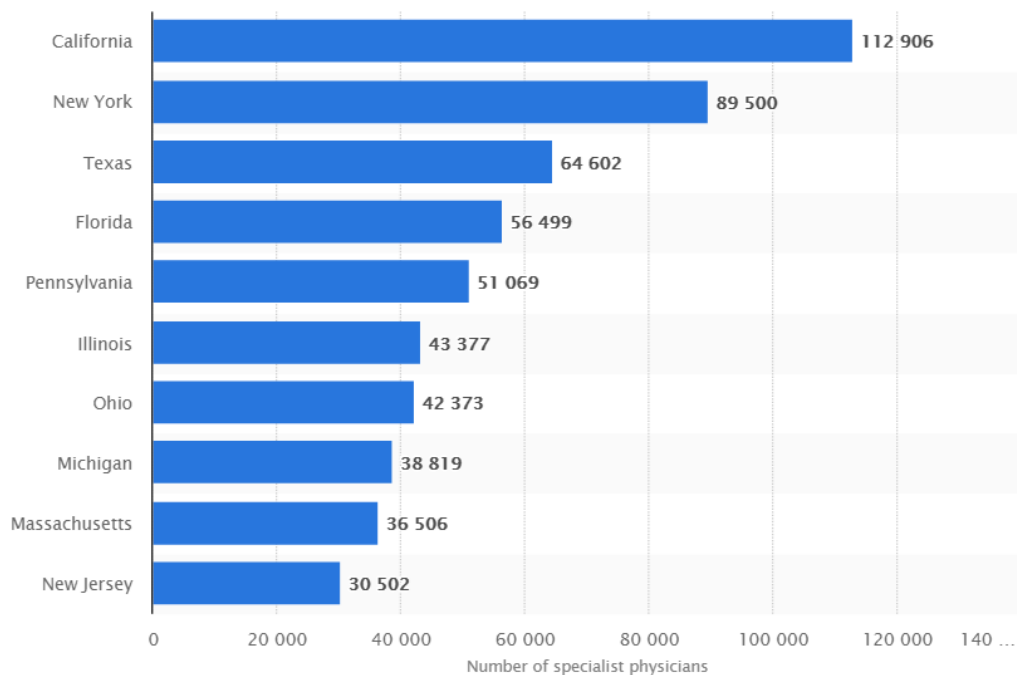

## Is Physicians Shortage affect Healthcare Business!

Healthcare is one of the biggest industries in the US with high turnover. A recent study from AAMC shows that physician growth will get increase much more compare to previous years due to the increase in population.

US B2B Healthcare Growth Rate

The US population is going to hit 347.34 million by 2025 and the physician growth rate will be much more compare to previous years to serve healthcare. As per the 2019 physicians, the workforce in every state is mentioned in the below graph. By 2025 Physician Growth will be 14 to 15 percent higher then current growth that makes **healthcare market** as one of the highly demanding markets in future.

## Things Need to Consider for Healthcare Business Growth

When it comes to healthcare marketing, contacting the relevant physicians is more important to sell your products/services. According to the American Medical Association (AMA) research, less than 50 percent of physicians have ownership in 2016. Nowadays physicians avoiding the risk of running an independent practice, in favor of employment by bigger medical groups or hospitals.

90% of Physicians were independent in 2000

60% of Physicians were independent in 2015

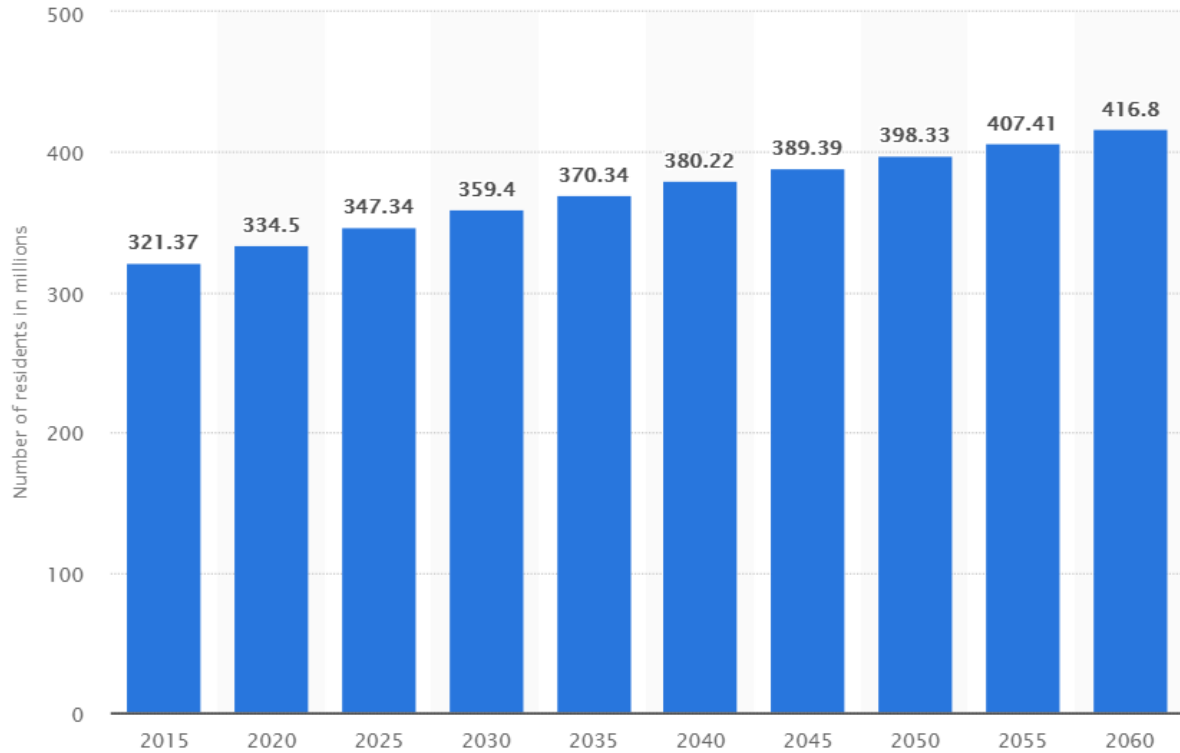

40% of Physicians were independent in 2019

If the physician is part of the bigger medical group or employed as part of the hospital staff, Physicians always have more influence on product purchase decisions. Healthcare Marketers should target physicians according to the medical technology that you promote. Also, Engaging your business with Bigger medical group or hospital will increase your conversion in upcoming years.

## How Physicians Demand Is Growing Faster than Supply?

There are various factors that allowing the demand of physicians very high in the U.S.

Approximate U.S Population by 2060

Increase in Population

By 2025 U.S population is estimated around 345,084,551. This is one of the reason that rise demand of physicians. By 2025, the United States required 260,680 primary care physician, an increase of 51,800 from the current work force (2019).

Increased Life expectancy Level

By 2025, the number of people aged over 65 get increase according to recent survey in the US. Its one of the reason for rising demand of physicians.
